Vol. 7, No. 4

PROGRAM HOW TO COUNT - INTERRATEDLY!

MONDAY, APRIL 10, 1972 - 8:00 p.m.
Red Cross Building, 695 Springfield Ave. Summit

The magazines and ads are tauting digital circuits and counters and integrated circuits and all that to a fare-the-well. But how does the average ham use digital techniques and how can he build a counter or whatever with those little chips called integrated circuits? At our April Meeting, HAYDEN EVANS, W2BZT, will be with us to answer the above questions and to show us how he has put the latest digital units to work for him in a very nice counter for use in his shack.

Hayden is well known to many of us in the club, although it has been a few years since he has been our speaker. He holds many international DX awards and is really a ham's ham, knows how to operate; and knows how to tell others how to operate, how to build things that work, and how to be a more accomplished ham. Those who haven't met Hayden are in for a treat - those who know him expect one.

COMING PROGRAMS MEETING ON MAY 8th.

The meeting on May 8th will be set aside to plan for the Annual Field Day event. We'll compete on June 24-25 as our June Meeting.

NOTEWORTHY ABOUT C-MULTIPLIER BOB

Bob, W2YFM, has finally thrown in the towel. He is becoming an appliance operator. Affluently, he is splurging on all sorts of factory-made equipment, including a Drake 2C receiver. Rumor has it that he is modifying it to fit inside his BC348 cabinet so that no one will know.

Honorary Member, Dr. E. Stuart Davis, W2ZH, has been busy since last December cataloging the collection of Western Union Telegraph equipment in the Smithsonian "Instution" in D.C. He's also preparing a telegraph exhibit for the Museum of the City of New York to commemorate Morris' Birthday.

Frank Arvay, W2NVA, was heard briefly on the 2-meter Sunday night net recently. He failed to make a contact though - since his receiver was tuned to the wrong frequency. Voorhis, who keeps the net records, marked you present so keep trying Frank.

Joe Savarese, our refreshment committee, is waiting the good word following his recent license exam. Good luck, Joe!

FOR SALE BY WB2VHC - Phone 376-4584

Johnson Directional Coupler and S.W.R. Indicator -\$15
