AMATEUR SATELLITE COMMUNICATIONS

Ed Bizub, WA2CBB, regional AMSAT coordinator will discuss amateur satellite communication in general plus plans for the new and improved OSCAR 8 satellite at our April meeting. Bring a buddy to the New Providence Library at 8pm, April 12, to hear the latest about this fascinating method of communications.

NOVICE COURSE REPORT

The Novice course is still going strong! Bob Brown reports that he has given the code test to several of the students and several have passed the novice receiving test. Debbe Weiner has passed both the sending and receiving test. Congrats to Debbe, Patty and Fred! Bob Brown has put together a recorded code course which is available on cassette.

CLUB CHATTER

Charlie Wernier, WB2DZM, is now putting out strong RTTY signals when he is home from college. Bob Brown still needs more QSL cards for WPARC's bicentennial exhibit. If you haven't done so, don't forget to bring two clean copies of your own QSL's for Bob at the next meeting. Field Day will be here before we know it, so how about a little advanced planning?
