

June 11 Meeting To Feature Field Day Plans

Field Day Chairman Andy Stillinger, WA2DKJ, will lead this important planning meeting for our annual NPARC outing. This year, Field Day will be held on June 23 and 24 at the usual rustic site in the "rugged wilderness" of the Watchung Mountains. Weather conditions have been predicted to range from very good to excellent. Band conditions are expected to be the best ever.

To insure Field Day success, members are invited to contribute their experience to the process by attending this organizational meeting.

NPARC Members Upgrade At Morris Plains

Bob Brown, W2EME, and Webb Linzmayer, WA2MOT, passed FCC exam elements at the Morris ARC sponsored visit of the FCC field office staff. Bob added a Radiotelephone 1st Class ticket to his collection. Webb moved up to Amateur Advanced Class. (He also passed the Extra Class code test but couldn't stay to take the written portion.)

Fourth Monday Program Notes

Jim Mann has completed a survey of NPARC member ideas of subjects for the 4th Monday meetings. He would like to hear from volunteers who can prepare and deliver programs on these interesting technical topics.

DUNAGIN'S PEOPLE

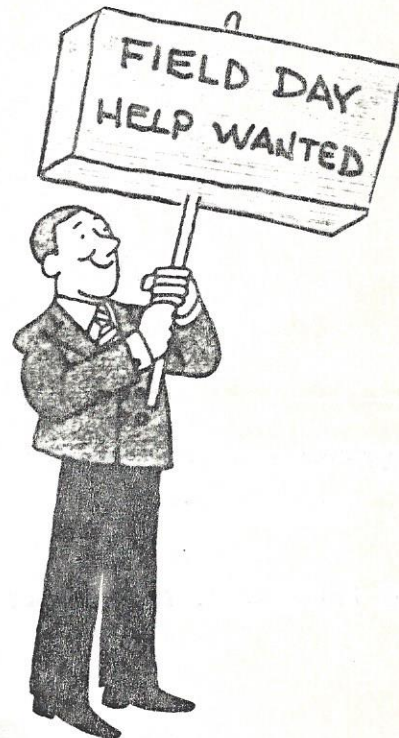

BY DUNAGIN

Following Field Day weekend, there will be no meeting on Monday, June 25.
