March 1970

New Member Meeting - March 9, 1970

The next meeting of the NPARC will be held, as usual, on the 2nd Monday of the month at the Red Cross Building, 695 Springfield Avenue, Summit. You know what fine meetings we have having - so plan to come to the March 9 meeting for more of the same. But this time, bring a potential new member - perhaps a hame new to this area who is looking for some club activity, or maybe someone who is interested in what amateur radio is all about. Give your friend a chance to see what we have to offer. I'll bet we have some acitvity that will interest him - and the more active members we have, the more we all gain.

March 9 Our Program Features Talk on Radio Interference

Through the efforts of Irv Perry, W2ARL, we will be treated to a fine discussion on "The Location of Radio Interference on Power Lines" by George K. Schiffmayer, W2KMK. George will give an illustrated lecture on power line interference from the point of view of the radio amateur. George was first licensed in 1937, is a member of QCWA, and is a past president of the Tri-County Radio Association. He is well qualified to speak on the subject since he is a past chairman of "The Middle Atlantic Utilities Radio Association," a group of professionals concerned with radio control and communications for utility users, and has long been a consultant on mobile radio communications for various professional uses, such as police, fire and utility organizations. George recently retired from the Public Service Electric and Gas Co.

Items for Your Calendar
