

RTTY - Radio Typewriter Fundamentals

John Sheets, K2AGI, will be our speaker at the November meeting of our Club. John will introduce the subject of RTTY so that we will all know what W2CGX, W2YFM, W2GMI and some others are talking about when they use such terms as Mark, Space, Baud, Shift, and so on. John will also demonstrate some of the functions of a TU (Transmitting Unit) and F.S.K. (Freq. Shift Osc.) Sooooo-don't miss this chance to become a "RITTY" Expert at the hands of the Old Pro himself.

DATE: MONDAY, NOVEMBER 8, 1971 - at 8 o'clock, p.m.

At Summit Red Cross Building, 695 Springfield Avenue, Summit

Linear Amp. Parts Available

Last month we learned from Bob, W2YFM, all about the construction of a Linear Amp. Some of the parts have become available to members of the Club (free) who want to build a linear, match box, or the like. Through the generosity of a local ham, we have acquired coils, transformers, capacitors, and so on. See Bob, W2YFM or Barry, W2CGX, for your needs.
