November Meeting-TVI AND HOW TO CURE IT!

Most of us look on in awe at what Barry Cohen, our one man Television Interference Committee is able to accomplish. Solving TVI (and sometimes hi fi interference problems) is necessary to keep on good terms with our neighbors. Barry is just back from Europe, and he's going to tell all, including the basics of keeping out of neighboring television sets and how he solves the tough ones. See you Monday, Nov. 14, 8 pm, at the New Providence Library meeting room.

November Meeting-CRAB BAG NIGHT!

It's not Christmas yet, but you are invited to get in the Christmas spirit by joining in this fun event. Bring an item, less than three dollars nominal value, wrapped, and useful for amateur radio (no elephant tasks). Those depositing items in the bag at the beginning of the meeting will get a ticket which, when surrendered later on will permit them to reach in the crab bag and claim a surprise! Unclaimed items will be given by raffle and the youngest members in the order that they present themselves.

Election of Officers

The Crab Bag procedure will definitely not be used to elect our 1978 officers at the November meeting. However, it is election time, and the nomination committee headed by proxy Bob Craig will have a slate. Every member not hospitalized should get out and vote. Nominatory speeches and campaigning will be limited.

Christmas Banquet Reminder!!!

Don't forget that Friday, December 9 is the date of our annual Christmas party. It will include installation of our new officers and kudos for the old ones. Particulars such as cost, program, etc. are discussed in the attached flyer. The place? Where else but the King George Inn!!

Device Class in High Gear!

Bob Brown, W2RJA, and Bob Craig, W2BAE, are maintaining intensive device operations at the New Providence Library every Monday. Classes have just started. Don't miss the last day!

RFI Alert

Start 75 dB at 100 ft. 35.00
Add power supply for noise 5.00
Add 100 ft. shielded cable 20.00
