

FALL RADIO ACTIVITIES BEGINNING!

After an exciting summer with numerous technical meetings and Sunday night get-togethers on the Club's RTTY and voice 2-meter nets, mobile operation on vacation trips, etc., it's time to get ready for a humdinger of a fall program. Look up Activities Manager John Myrick's 1977 meeting schedule in case you have forgotten what is ahead - or read the "SPARK GAPS"! Our meeting schedule hasn't changed - regular club meetings on the second Monday of each month and technical meetings on the fourth. Both are in the basement meeting room of the New Providence Library at 8 PM.

SEPTEMBER MEETING - "MOTIONS OF THE EARTH"

Gene Fry, K2CW, and fellow clubmembers will discuss the 17 motions of the Earth (and you thought there were only three!). Using a handout as a guide, Gene will explain this variety of motions of our planet. He will also mention those of interest to communication satellite users.

Bring a friend and lets all get reacquainted after our summer break on Monday, Sept. 12, at 8 PM, at the New Providence Library.

1977 FIELD DAY

Thanks to General Chairman Wilbur Fulton, numerous station chiefs and operators, Bob Craig's excellent food, Ralph Elspass and his power crew, Field Day once again was a big success! Al Hirsch wrote the best article for the local paper that we have had in years, and Gerry Hughes was our antenna chief. A list of everyone who helped would fill this issue so lets give a big "Hurrah!" for those who did and start planning early for next year.

CLUB CHATTER

Bob Ruedisuelli is on the air from Virginia with a new W4 call (unavailable at press time). Larry Ruedisuelli, WB2FTQ, is now living in Summit and contacts his dad frequently. Bay Rowan is still building clocks and now has his frequency counter arranged to measure capacitance. Bay says that he is still missing the dummy load borrowed from him many months ago. It belongs to the Air Force who are recalling it, and he would like it back.

FOR SALE

Heath DX-100	160-10 meters AM/CW/VFO	\$75
Hammarlund HQ170A	160-6 meters AM/CW/SSB	\$135
